One end of the Rake can be used for loosening the soil between the rows, and the other end can be used as a cultivator or can be inserted in the ground and pulled underneath the plants, cutting all the long tap roots over, instead of transplanting. Price, \$1.00.

SEED ANNUAL

for 1928

IN presenting this, our fourteenth annual Seed List, we wish to express our thanks to all our customers for the confidence and patronage we have received, and we trust you will continue to send your orders this way. We aim to have only the very best and most reliable seeds which it is possible to get, and we import a large part of our seeds from the best growers in Denmark and other European countries. We realize that a Gardener or Florist cannot be too careful in the selection of the seeds he is using and therefore we are very cautious in getting the seeds from the best sources we know of.

We do not treat any seeds unless asked for as such seeds are not allowed to be sent by parcel post, but we recommend the buying of either Semesan or Uspulun and treat the seeds on your own premises before seeding.

Any orders you may send us will receive our most careful attention.

Respectfully yours,
DANISH SEED IMPORT,

Chris Mosberg.

EVERGREEN

NON-POISONOUS INSECTICIDE

EVERGREEN is a new non-poisonous insecticide, which has quickly gained favor wherever it has been used. It kills nearly all kinds of insects including Lice, Cabbage Worms, Potato Bugs, Cutworms, Squash Bugs, Mealy Bugs, Thrips and in fact nearly all living insects will be destroyed when in contact with this liquid. It is very easy to use, and harmless to man, animal and bird, has a pleasant odor. It is sold in a very concentrated form, and what is not used can be kept for years without losing its strength, if the bottle is kept corked. It will not injure or burn any tender plants, and is not injurious to the soil, but it is certain death to insects. The Florist, the Market Gardener and the Home Owner will find many uses for this Insecticide for destroying insects. As it is not a poison Evergreen can be sent by mail, and the diluting formula is printed on the bottles.
